

SunClad USA Sliding Door Roller Adjustments

Tools Needed:

Putty Knife
Phillips Head ScrewDriver

Instructions:

1. Take the putty knife and maneuver underneath the very bottom circular cap

Figure 1:
Circular Cap in place

Figure 2:
Putty knife removing circular cap

2. Pry the circular cap loose with the putty knife

Figure 3 and 4: Cap Removed

3. Take the Phillips Head ScrewDriver to rotate the screw located in the back of the hole
 - a. Rotate ScrewDriver Clockwise to adjust the panel upwards (Fig.5)
 - b. Rotate ScrewDriver Counter Clockwise to adjust the panel downwards (Fig.6)

Figure 5

Figure 6

4. Once adjusted, check the panel by closing the panel to 1/4" from the jamb
5. View the gap to ensure it is consistent from top to bottom and make adjustments as necessary
6. After adjustments are complete, push the circular cap back into the hole
