

SunClad USA Easy-Tilt
Double Hung Window

The USA Easy-Tilt Double Hung window is the latest generation of Sun's popular tilt-sash, clad-wood double hung window. A newly designed sash and frame improves both the function and appearance of the window.

Featuring traditional sash-over-sash (hung sash) design, both sashes open for ventilation and tilt-in for easy cleaning of both the interior and exterior glass surfaces, all from inside the home. An innovative combination of floating jamb liners, with finger release tilt-sash operation, provides excellent air and weather seal performance. The Easy-Tilt sash locks and finger release hardware are recess mounted into the sash check rail.

The frame and sash have been redesigned to improve the joinery and appearance. The new exterior mull receptor groove provides for a cleaner appearance when two or more units are mull together. The interior head stop has increased depth for improved weather and air-seal performance. The redesigned checkrail and meeting rail improves the locking function and provides for easier top sash reglazing. The new sash profile also provides a recessed area around the daylight perimeter to accommodate grille systems and improve overall appearance.

As with all Sun Clad products, the USA Easy-Tilt is designed and built to provide superior energy saving performance. Select Low-E Insulated Glass with Argon to take advantage of Sun's best energy performance combination. Upgrade to ClimaGuard SPF™ glass for the ultimate in UV protection.

The USA Easy-Tilt is a high quality, dependable window that will serve you and your home for many years.

Features & Options

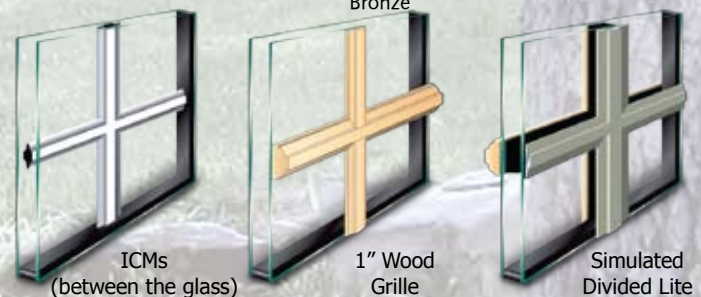

- Durable SunClad Exterior protects the window and the home for years of trouble free service.

White Tan Bronze Faux Oil-Rubbed Bronze Brushed Chrome Brushed Nickel

ICMs (between the glass) 1" Wood Grille Simulated Divided Lite

Companion Products: SunClad Double Hungs can be combined with companion products to form special feature windows. Available companion products are Fixed Lites, Transoms, Round Tops, Arch Tops, Quarter Round Tops, Eyebrow windows, Custom Geometric Shapes and Gothic windows.

Window Combinations: SunClad Double Hungs are designed so that they can be easily grouped together to form multi-unit configurations. These can be as simple as combining two units together, side by side, to form a 2-wide unit, or as complex as combining multiple units of various styles and shapes to form a special feature window wall. Send us your ideas and we will help you configure your special combination.

Special Needs or Requirements: If your project has special needs or requirements, contact your Sun Representative or Sun Windows Customer Service Department to make your request. Sun will be glad to review your project to see if we can help you meet your needs.

The Best UV Protection Under The Sun

CLIMAGUARD SPF™
COMPLETE UV PROTECTION

Sun Windows is proud to offer ClimaGuard SPF™ on many of our SunClad products. ClimaGuard SPF™ offers the best UV protection available in residential windows and doors.

ClimaGuard SPF™ protects home furnishings from the fading effect of the sun without sacrificing natural daylight and the appearance of uncoated glass.

What Makes ClimaGuard SPF Unique?

Superior fade protection—Even the highest performing Low-E products come up short on UV protection. **ClimaGuard SPF Blocks 99.9% of both UV-A and UV-B radiation. Better than any other UV glass.**

Clear quality—ClimaGuard SPF looks the way window glass should look—no bright colors, no dark tints, and no shiny reflections.

Superior comfort and energy savings—when combined with low-E glass, maximizes comfort and minimizes heating & cooling costs by keeping heat where you want it—regardless of the climate or season.

Count on ClimaGuard SPF's unique combination of patented technologies to provide superior protection and performance, year after year.
