

SunClad USA Easy-Tilt Double Hung Window

with 3-1/8" Replacement Frame System

SunClad-Wood Double Hung Replacement Window

The SunClad USA Easy-Tilt Double Hung replacement window is Sun's clad-wood double hung replacement window. It is based on the design of the new construction USA Easy-Tilt double hung with many of the same features and benefits, but with a frame system that is designed to fit replacement window applications.

It features sash-over-sash design where both sashes open for ventilation and tilt-in for easy cleaning of the exterior glass surfaces. An innovative combination of our positive contact floating jamb liners with finger release tilt-sash operation provides excellent weather seal performance along with easy tilting sashes. The sash locks and finger release latches are recess mounted on the sash lock rail rail. The heavy sash rail features Sun's distinctive rounded front profile.

As with all Sun Clad products, the USA Easy-Tilt is designed and built to provide superior energy saving performance. Select one of Sun's Low-E Insulated Glass configurations to take advantage of Sun's best energy performance combination for your needs. Additionally, upgrade your Low-E IG with ClimaGuard SPF™ glass for the ultimate in UV fade protection.

The USA Easy-Tilt is hand crafted to provide you with a high quality and dependable window that will serve you and your home for many years.

SunClad USA Replacement Window

Replace Your Old Windows with New USA Windows

CLIMAGUARD SPF™
COMPLETE UV PROTECTION

Sun Windows is proud to offer ClimaGuard SPF™ on many of our SunClad products. ClimaGuard SPF™ offers the best UV protection available in residential windows and doors.

ClimaGuard SPF™ protects home furnishings from the fading effect of the sun without sacrificing natural daylight and the appearance of uncoated glass.

What Makes ClimaGuard SPF Unique?

Superior fade protection—Even the highest performing Low-E products come up short on UV protection. **Blocks 99.9% of both UV-A and UV-B radiation.**

Clear quality—ClimaGuard SPF looks the way window glass should look—no bright colors, no dark tints, and no shiny reflections.

Superior comfort and energy savings—when combined with low-E glass maximizes comfort and minimizes heating & cooling costs by keeping heat where you want it—regardless of the climate or season.

Count on ClimaGuard SPF's unique combination of patented technologies to provide superior protection and performance, year after year.
